***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The following changes have been made to the subject application:

**In Abstract:**

The abstract has been replaced with a new abstract as follow:

--An antenna system comprising a first multi-layer Printed Circuit Board having multiple antenna elements disposed thereon, at least a second multi-layer PCB, which is mounted below the first multi-layer PCB, and which comprises electronic components for processing Radio Frequency signals received by the antenna elements; and multiple RF transitions, which are mounted between the first and second multi-layer PCBs and are operative to transfer the RF signals from the first multi-layer PCB for processing by the electronic components in the second multi-layer PCB.--

The Examiner's amendment has been made to provide the application a better and precise abstract for the invention as described in the only independent claim (claim 51).

**Drawings**

The drawings filed on 12/12/2007 are acceptable subject to correction of the informalities indicated in the amended drawings attached in the Notice of Allowance. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

***REASONS FOR ALLOWANCE***

1. Claims 51 and 53-58 are presently allowed.
2. The following is an examiner's statement of reasons for allowance:

The cited art of record fails to teach an antenna system comprising a first multi-layer Printed Circuit Board having multiple antenna elements disposed thereon, at least a second multi-layer PCB, which is mounted below the first multi-layer PCB, and which comprises electronic components for processing Radio Frequency signals received by the antenna elements; and multiple RF transitions, which are mounted between the first and second multi-layer PCBs and are operative to transfer the RF signals from the first multi-layer PCB for processing by the electronic components in the second multi-layer PCB as defined in claim 51.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
